Product Feature: Eurotec Caseframe

The Eurotec Caseframe is designed for applications that require the mounting / housing of Eurocard form factor electronics, in either cards or modules. A step up from the standard subrack the Eurotec Caseframe provides either 19inch rack mounting, free standing desktop or portable design, which requires no external enclosure. The unit also offers optional EMC protection along with the integration of cooling fans and power supplies all self contained with an attractive style. Top and bottom covers are easily removed for system building and servicing.

Key Features are:

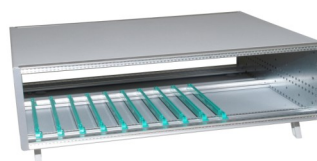

- Desktop, 19inch mounting or portable
- EMC Upgradable
- Easy access for assembly and servicing
- Attractive appearance
- 3U and 6U Form factor
- 3U/4U and 6U/7U heights to allow improved cooling & ventilation
- 3 height variants for each size
- 3 depth variants
- KM6 II compatible
- Wide range of accessories

The Eurotec Caseframe offers 3 main styles:

Desktop - with front trims giving a neat appearance and front fold down feet and non slip feet to the rear

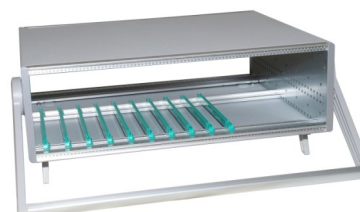

Rack Mount—with 19inch rack angles to the front allowing it to be fitted to an IEC 297 rack or cabinet

Portable—with a stylish locking swing handle for carrying and providing a front support

Recent Projects: VME Systems

“VME” is an acronym for “Versa Module Eurocard” and is an open, industrial computing architecture widely adopted in land, sea and airborne military applications. Verotec has recently delivered a number of COTS (commercially off the shelf) VME systems to a leading military subcontractor for use with ASTUTE— the UK's next-generation nuclear submarine programme. The systems were assembled with Verotec's leading
